

Dragon Star Protection Ltd.

Mission Statement

We at DSP represent a unique idea. We are a team of multi-disciplinary, highly committed risk management professionals that brings quality risk management services to the market. Our vision embraces five core values centred around People, Talent and Hard Work, Ideas, Ethics and Standards. We value our business partners, members of the TEAM, affiliates, associates and particularly our clients, at whose service we are and on behalf of whom we desire to offer our expertise in prevention, protection, preservation and risk management.

Business risk constantly evolves; to stand still in operational risk management is to invite reversals. As facilitators of the operational risk management process, DSP places significant value on creative thought, particularly from within organisations themselves. Operational risk management demands context-specific solutions, and the combination of our expertise and know-how with our clients' own ideas and views produces cost-effective, sustainable solutions.

DSP and our TEAM have gathered a wide of range of experience within this sector, whether it is small or on a grand scale. We take pride in maintaining excellent relationships with many festival and event organisers throughout the United Kingdom.

We believe our role is to assist organisations in preventing loss, protecting their primary assets, preserving conditions that guarantee success and managing residual risk. We help businesses achieve these objectives through persistence, integrity, commitment and in complete confidentiality.

Sincerely,

Dragon Star Protection
